## Give Them Tomorrow

With your help, we can prevent preterm birth in Michigan.

Leading preventable causes of premature birth in Michigan include: tobacco use during pregnancy, lack of health education, good health status prior to pregnancy and a lack of access to proven interventions for women with prior preterm birth.

March of Dimes grantees in West Michigan are positively impacting birth outcomes. Each partner is conducting a program that will increase preconception and prenatal health knowledge, positively change behavior and/or increase positive birth outcomes. We are grateful to work with committed partners in an effort to give every family a chance at a happy, healthy start.
